

Artist Statement
Lindsey Ledbetter

My Art Consists mainly of digital pieces, but rarely go out of bounds and use traditional media, watercolors being my favorite. Being Heavily inspired by cartoons and anime throughout my life. Throughout my works You can see an exploration of color that invites viewers to explore the emotions and creativity through these experiences I've encountered. Through pokemon, craig of the creek, and spongebob, all these different emotions help me to create what I love, with the funny laid back feelings to the more intense emotions we all deal with throughout our everyday lives. These works not only bring me joy, but in turn hope to bring joy and emotion to others through the bright atmosphere I've created and the childlike wonder I've experimented with throughout my works.

Many of my works are digitally made using many of the Adobe tools, to enlist my many creative endeavors, as well as my handy iPad to help with digital drawings, and smaller animations. Using procreate, photoshop, after effects, as well as premier pro, and some experience in html and css coding as well as video editing and photography skills, these are all tools that can help create the perfect vision I want to create with my art.

With all these skills I've learned and used so far to create my works, I'm hoping to bring about more emotions, thoughts, perspectives, as well as experimenting with the childlike wonder we all have slowly lost track of over the years through expression of colors and emotions to help us all get back to what we've been truly missing.
